

AGILE EXPERIENCE WORKSHOP

Understanding and experiencing agility

BENEFITS FOR PARTICIPANTS

- The participants will experience and come to understand, on more than just a cognitive level, agility due to the extraordinary dramatization of the workshop.
- The participants will build a theoretical expertise while working on the topic agility (what is and what is not agility?)
- After the workshop participants will be able to judge to which degree Agility plays, or could play, a role in their department.
- The participants can relate the content to themselves and to their everyday work and bring in individual practical topics directly to the workshop.

SCOPE OF THE WORKSHOP

- Type: Workshop with 6-12 participants (in presences)
- Length: 1-2 days
- Trainer: David Altundag
- Agenda:
- Simulation to understanding agility (Lego Scrum City)
 - Why agility? Understanding the concepts and context
 - The six dimensions of agile transformation
 - Familiarization with methods and tools for agility
 - Discussion and analysis of participants individual topics in the context of agility

THE WORKSHOP WILL ANSWER THE FOLLOWING QUESTIONS

- how can participants achieve a pragmatic and modern understanding of agility which is applicable to every company or individual aspect in their domain,
- how can participants become drivers or sparring partners for agile transformation topics,
- how can participants find motivation and confidence to proactively pursue agile topics in their company.
